SC2260R4

SC2260 Description: (Compatible:PT2260)

SC2260 is a remote control encoder paired with either SC2272 utilizing CMOS Technology. It encodes data and address pins into a serial coded waveform suitable for RF modulation. SC2260 has a maximum of 10bits tri-state address pins providing up to 59049 address codes; thereby, drastically reducing any code collision and unauthorized code scanning possibilities. SC2260 is one of the first generation of Encoder/Decoder ICs that utilizes the unique PTC technology. When paired with SC2272, this encoder/decoder (SC2260/SC2272) pair can operate at very wide temperature range. Thus, this very important feature enables your encoder/decoder to operate under the worst environmental condition.

SC2260 Features: (Compatible:PT2260)

- Low power consumption
- Wide operating temperature range: -30 ~ 70 °C
- 8 or 10 tri-state code address pins
- 2 or 4 data pins
- Wide range of operating voltage :1.8- 10 volts
- Single resistor oscillator
- Least external components

SC2260 Applications: (Compatible:PT2260)

- Home/motor car security system
- Garage door controller
- Remote fan controller
- Remote control toys

SC2260 Pin Configuration: (Compatible:PT2260)
